being, the store app works with photos that can be seamlessly dragged and dropped into Office and other apps that are available for Windows and Android alike. However, Microsoft plans to add support to send and receive text messages, make calls get and notifications from the smartphones in the future. Unfortunately, compared to what Microsoft revealed when they first mentioned the tool, the app lacks numerous features that they previously demonstrated. Nevertheless, if they are going to be added, then it means Windows can come more in line with macOS, which permits easy transfers from iPhones for years. In the eventuality that you own a smartphone that runs Android 7.0+ and would like to access its photo content from your Windows 10 computer without having to waste time emailing yourself, perhaps you can consider giving Your Phone a try. Keep in mind that it is just a preview For now, the app is still in the testing phase, so there could be some flaws to be ironed out. Although the fact that your smartphone is already being paired to your computer could be a sign of what's to come. In fact, the official version of Your Phone should be available to install before the end of the year. While you wait for that to happen, you can enjoy your Android device and try to make the most of the new feature. After all, it is still early days, but Your Phone could be the solution you have been looking for to complete the most basic tasks without having to send an email first.
