Purification and characterization of alpha 2-macroglobulin-degrading enzymes from mouse peritoneal macrophages. The collagen-bound macrophage-derived metalloprotease was purified from mouse peritoneal macrophages by the sequential affinity column chromatography on collagen (type I)-Sepharose and gelatin-Sepharose. The enzyme had a molecular weight of 30 kDa, which coincided with the molecular weight of the subunit, and consisted of three identical subunits. The enzyme was inhibited by p-chloromercuribenzoate and 1,10-phenanthroline. However, the enzyme was not inhibited by EDTA, indicating that it is not a metalloprotease. Based

Collaborate with a remote team with the new AutoCAD 360 web app Revit 2020.1 Revit 2020.1 introduces the new drawing document type, Standard 3D View, to help you deliver project updates more efficiently in the Autodesk Revit 2020.1 software. To access the new drawing document type, go to the Documents and Models pull-down menu, and choose Standard 3D View. The new document type simplifies the process of updating a project by allowing you to easily switch between 2D and 3D views and maintain the existing structure of your drawing. The new document type is designed to complement the Autodesk Revit 2020.1 software's navigation. With the new 3D view type, Autodesk Revit 2020.1 gives you an easy and simple way to navigate the 3D view hierarchy while working with any 3D elements in your project. In a 3D view, as you move around the X, Y and Z axes, the viewport will automatically adjust to reflect the position of the user relative to the viewport. In the Standard 3D View type, the viewport adjusts in the same way, but the changes are always applied to the entire project. This document type also features the ability to annotate the viewport with global annotations like notes, dimensions, and text. With these new features, you can capture and record the most important information from your projects, so that you can more easily share your knowledge, deliver project updates and create beautiful and dynamic content. For more information on the new Standard 3D View document type, see the Get Started with Autodesk Revit documentation.
